Peter Dederich Superintendent, San Juan Island National Historical Park P.O. Box 429 Friday Harbor, Washington 98250

Diane Spencer Environmental Project Manager Western Federal Lands Highway Division 610 East Fifth Street Vancouver, Washington 98661

Re: U

U.S. Environmental Protection Agency (EPA) comments for the San Juan Island National Historical Park (Park) Cattle Point Road Realignment Project Draft Environmental Impact Statement (DEIS). EPA Project Number: 01-064-DOI

Dear Mr. Dederich and Ms. Spencer:

This review was conducted in accordance with our responsibilities under the National Environmental Policy Act (NEPA) and Section 309 of the Clean Air Act. Under our policies and procedures, we evaluate the environmental impact of the proposed action and the adequacy of the impact statement. We have assigned a LO (Lack of Objections) rating to the DEIS. A copy of the EPA rating system is enclosed.

While our review has not identified any potential environmental impacts requiring substantive changes to the proposal, we believe the application of additional air quality mitigation measures – consistent with the Park's General Management Plan (GMP) - could be accomplished with no more than minor changes. The DEIS's Air Quality mitigation measures (AQ-1 through AQ-4, p. 161) do not appear to fully incorporate the Air Quality mitigation measures listed on page 71 in the Park's Final GMP/EIS. We especially support incorporating the full suite of GMP measures identified for dust abatement and equipment emissions. For additional information on construction mitigation measures, case studies, and examples of institutional arrangements for implementation, see the Clean Construction USA website at http://www.epa.gov/otaq/diesel/construction/.

If you have any questions or concerns please contact Erik Peterson at (206) 553-6382 or by electronic mail at <a href="mailto:peterson.erik@epa.gov">peterson.erik@epa.gov</a>.

Sincerely,

Christine B. Reichgott, Manager

Environmental Review and Sediment Management Unit

Enclosures

EPA Rating System for Draft Environmental Impact Statements

## U.S. Environmental Protection Agency Rating System for Draft Environmental Impact Statements Definitions and Follow-Up Action\*

#### **Environmental Impact of the Action**

#### LO - Lack of Objections

The U.S. Environmental Protection Agency (EPA) review has not identified any potential environmental impacts requiring substantive changes to the proposal. The review may have disclosed opportunities for application of mitigation measures that could be accomplished with no more than minor changes to the proposal.

#### EC - Environmental Concerns

EPA review has identified environmental impacts that should be avoided in order to fully protect the environment. Corrective measures may require changes to the preferred alternative or application of mitigation measures that can reduce these impacts.

### **EO – Environmental Objections**

EPA review has identified significant environmental impacts that should be avoided in order to provide adequate protection for the environment. Corrective measures may require substantial changes to the preferred alternative or consideration of some other project alternative (including the no-action alternative or a new alternative). EPA intends to work with the lead agency to reduce these impacts.

#### EU - Environmentally Unsatisfactory

EPA review has identified adverse environmental impacts that are of sufficient magnitude that they are unsatisfactory from the standpoint of public health or welfare or environmental quality. EPA intends to work with the lead agency to reduce these impacts. If the potential unsatisfactory impacts are not corrected at the final EIS stage, this proposal will be recommended for referral to the Council on Environmental Quality (CEQ).

#### **Adequacy of the Impact Statement**

#### Category 1 – Adequate

EPA believes the draft EIS adequately sets forth the environmental impact(s) of the preferred alternative and those of the alternatives reasonably available to the project or action. No further analysis of data collection is necessary, but the reviewer may suggest the addition of clarifying language or information.

## Category 2 - Insufficient Information

The draft EIS does not contain sufficient information for EPA to fully assess environmental impacts that should be avoided in order to fully protect the environment, or the EPA reviewer has identified new reasonably available alternatives that are within the spectrum of alternatives analyzed in the draft EIS, which could reduce the environmental impacts of the action. The identified additional information, data, analyses or discussion should be included in the final EIS.

### Category 3 – Inadequate

EPA does not believe that the draft EIS adequately assesses potentially significant environmental impacts of the action, or the EPA reviewer has identified new, reasonably available alternatives that are outside of the spectrum of alternatives analyzed in the draft EIS, which should be analyzed in order to reduce the potentially significant environmental impacts. EPA believes that the identified additional information, data, analyses, or discussions are of such a magnitude that they should have full public review at a draft stage. EPA does not believe that the draft EIS is adequate for the purposes of the National Environmental Policy Act and or Section 309 review, and thus should be formally revised and made available for public comment in a supplemental or revised draft EIS. On the basis of the potential significant impacts involved, this proposal could be a candidate for referral to the CEQ.
